

Assignment - 2 Personal Expense Tracker

Ragul V
PNT2022PMID19316

Creation of Table:

The screenshot shows the IBM Db2 on Cloud interface. The 'Tables' tab is selected, displaying a list of tables in the 'NLG66799' schema: 'USER' and 'USERS'. The 'Table definition' panel for the 'USER' table is open, showing the following columns:

Name	Data type	Nullable	Length	Scale
EMAIL	VARCHAR	Y	32	0
USERNAME	VARCHAR	Y	32	0
roll number	VARCHAR	Y	32	0
PASSWORD	VARCHAR	Y	32	0

A 'View data' button is visible at the bottom of the table definition panel.

Insertion into USER Table:

The screenshot shows the IBM Db2 on Cloud interface with the SQL editor open. The editor contains the following SQL statement:

```
1 insert into USER values('user1@gmail.com', 'user1', '0001', 'pwd1');
2 insert into USER values('user2@gmail.com', 'user2', '0002', 'pwd2');
3 insert into USER values('user3@gmail.com', 'user3', '0003', 'pwd3');
4 insert into USER values('user4@gmail.com', 'user4', '0004', 'pwd4');
```

The 'Run all' button is visible in the top right corner of the editor. The left sidebar shows the 'Data objects' tree with the 'NLG66799' schema expanded, showing 'Tables' and 'USERS'.

Run all

```
1 delete from user where username='user5';
```

History

Find history

The screenshot shows the IBM Db2 on Cloud console interface. At the top, there's a navigation bar with 'Load Data', 'Load History', 'Tables' (selected), 'Views', 'Indexes', 'Aliases', 'MQTs', 'Sequences', and 'Application objects'. Below this, a table titled 'NLG66799.USER' is displayed. The table has four columns: 'EMAIL', 'USERNAME', 'roll number', and 'PASSWORD'. It contains three rows of data. To the right of the table, there are buttons for 'Back', 'Export to CSV', and a download icon. On the left side of the console, there's a sidebar with icons for 'SQL', 'Tables', 'Views', 'Indexes', 'Aliases', 'MQTs', 'Sequences', and 'Application objects'.

EMAIL	USERNAME	roll number	PASSWORD
user2@gmail.com	user2	0002	pwd2
user3@gmail.com	user3	0003	pwd3
user4@gmail.com	user4	0004	pwd4

Connecting to IBM DB2 From Python:

```
conn = ibm_db.connect(
    "DATABASE=bludb;\
    HOSTNAME=54a2f15b-5c0f-46df-8954-7e38e612c2bd.clogj3sd0tgtu0lqde00.databases.appdomain.cloud;\
    PORT=30699;\
    Security=SSL;\
    SSLServerCertificate=DigiCertGlobalRootCA.crt;\
    UID=nlg66799;\
    PWD=CXtQLAGZ06fD0fhC;", "", "")
```

Source Code

App.py

```
from flask import Flask, render_template, url_for, session, request, redirect

import ibm_db

app=Flask(__name__, template_folder='templates')

app.secret_key='a'

conn = ibm_db.connect(
    "DATABASE=bludb;\
```

```
